

Make 3

Decimal Addition

A game for two players

You need a set of counters.

How to play

- Player A places a counter on any number.
- Player B places a counter on an adjacent hexagon and says the total of the two numbers.
- Player A then places another counter on an adjacent hexagon, and says the total of the three numbers.
- This continues, with players taking turns and keeping a running total.
- The first to reach a total of exactly 3 is the winner.
- Any player going over 3 loses.
